

## **CHAIRMAN COMMITMENT**

CHAINES FORTIA SAS is involved in a policy based on

- Identification and prevention of any risk involving health and security of each member of the staff and direct and indirect products consumer
- Environnemental respect and direct or indirect pollution diminution
- Identifying any partners' will in order to satisfy them

Anticipating ,thus, legal and rule requirements

Any member of the staff is aware of these goals, elaborated and planed by the direction board meeting, regarding its own responsibility level.

Thus, 2 managers, one technical, the other one administrative, both work with me in order to get the integrated managing system becoming dynamic, shared by all. They also sit up to the good internal communication, they plan the audits and managing meetings.

Reducing production throw up, replacement, suppression of any dangerous product for health or environment, rationalizing, modernizing , ameliorating our works are a day by day target and need financial efforts.

This commitment needs the whole staff agreement and acting.

We do not know the future products but we all know they will live from our will and implication.

**Michel ROUX**  
**CHAIRMAN**
